Spotlight: Virtual PBX

A Virtual PBX is an affordable, easy to use alternative to the high costs of buying and maintaining a traditional hardware-based PBX system. When your customers sign up for the RingCentral service, they will get a toll free or local number to serve as their main business number. In addition, all RingCentral Online plans include multiple extensions and mailboxes to quickly set up a complete phone system. Callers can be transferred to different extensions, which can be assigned to remote employees around the country.
